Every entry points to the page it came from.

Upload the medical records. Medcron builds a dated, visit-by-visit chronology from them, and a person reviews every visit against its source pages before you receive it.

Cited to the page

Each finding keeps the words of the record and the page it appears on. In the linked PDF, a click on any page reference opens that page with the passage marked.

Reviewed by a person

A reviewer checks every visit against its source pages and approves the chronology before it is released to you. Visit dates come from the documented date of service.

Private by design

Records are processed on hardware Medcron controls and not sent to outside AI services. They are deleted automatically 14 days after the order starts; encrypted backups expire within about 8 further days.

Firms that act as business associates of health care providers or health plans can rely on our Business Associate Agreement. It becomes part of our Terms when such a firm sends us protected health information.

What you receive

- A linked PDF: every page reference opens its page with the passage marked.
- An editable Word chronology, with a summary of providers, diagnoses, treatment, medications and gaps in care.
- An Excel workbook of every visit and finding.

Price and turnaround

- $0.75 a page, $75 minimum per order. You see the exact price before you pay; no subscription.
- Usually delivered within 4 business hours for files up to 200 pages, and by the next business day for larger files.

Turnaround is a target, not a guarantee. Business hours are 8:00 a.m. to 6:00 p.m. Pacific Time, Monday through Friday, excluding U.S. federal holidays.

Try it on a real case

Your firm's first chronology is free, up to 200 pages.
